### Introduction

In January 2019, the Georgia Department of Education (GaDOE) will release the Financial Efficiency Star Rating (FESR) for the 2017-2018 school year for each school district and school in the state. The FESR utilizes a three-year average of per pupil expenditures (PPE) and College and Career Ready Performance Index (CCRPI) scores to determine the district rating and a two-year average to determine the school rating. The ratings are displayed as supplemental information to CCRPI scores on the GaDOE CCRPI dashboard.

O.C.G.A. §20-14-33 requires the Governor's Office of Student Achievement (GOSA), in coordination with GaDOE, to create a financial efficiency rating. The law requires that GOSA and the GaDOE collaborate to "adopt and annually review, and revise as necessary, indicators of the quality of learning by students, financial efficiency, and school climate for individual schools and for school systems." Financial efficiency "may include an analysis of how federal and state funds spent by local school systems impact student achievement and school improvement, and components used to determine financial efficiency may include actual achievement, resource efficiency, and student participation in standardized testing." The rating must be based upon five stars.

The FESR applies a scale of one-half star to five stars, in which a rating of one-half star designates a high-spending district/ school with a low CCRPI and a rating of five stars designates a low-spending district/school with a high CCRPI. The FESR aims to provide information on the relationship between per pupil expenditure (PPE) and academic achievement. The FESR should be one measure that a user evaluates in conjunction with all other information provided for each school and district. A more detailed discussion of the limitations of this measure is in the last section of this guide.

The following calculation guide details the steps used to obtain each component of the FESR. The first section includes a brief overview of the funding process for Georgia public schools and lists the excluded expenditures for the purpose of the FESR. The second section details how the number of full-time students is calculated. The third section explains how the CCRPI is applied in the metric. The fourth section describes how to calculate the star rating, followed by a discussion of the release procedure. This guide concludes with a discussion of the star rating's limitations.

\_

<sup>&</sup>lt;sup>1</sup> Districts must have a calculated per pupil expenditure (PPE) and a CCRPI score in all three years (2015-2016, 2016-2017, and 2017-2018) to receive a star rating. Schools must have a calculated per pupil expenditure (PPE) and a CCRPI score in both years (2016-2017 and 2017-2018) to receive a star rating.

<sup>&</sup>lt;sup>2</sup> Starting with the 2019 FESR, school ratings will be based on a three-year average.

## **Overview of Expenditures Data**

## **Funding Sources**

School districts are funded with state revenue based on the Quality Basic Education (QBE) Act funding formula.<sup>3</sup> The funding formula considers the full-time equivalent (FTE) student enrollment that each district reports.<sup>4</sup> State funding is based on the number and characteristics of students the district serves, as well as categorical grants for various programs. Complete details of the funding formula are on GaDOE's website.

Additional funding sources for school districts in the State of Georgia include local property taxes, state grants outside of QBE, and federal grants. Federal Title I and special education grants are two prominent examples of additional funding sources.

With the exception of the exclusions listed on <u>pages 5-7</u>, the FESR uses expenditures from all revenue sources.

#### Explanation of School District Financial Expenditures

The following section describes the data used to calculate the FESR, including an overview of state accounting, and lists the expenditure categories that the calculation excludes.

#### Data Used

Each school district is required to submit a financial report, commonly referred to as the DE046, to the GaDOE for the fiscal year ending June 30<sup>th</sup>. The financial report is required to be in accordance with the Local Units of Administration (LUA) <u>Chart of Accounts</u>. Each September, school districts collect financial data for the previous fiscal year (FY). For example, the September 2018 financial data collection includes data from FY18 (July 1, 2017 through June 30, 2018).

#### LUA State Chart of Accounts

School districts record expenditures using a uniform state chart of accounts.<sup>5</sup> Districts are required to submit their fiscal year-end financial report (DE046) with all expenditures correctly coded to the uniform state chart of accounts. Each expenditure has an associated Fund, Function, Program, and Object code.

<u>Fund</u> – Governmental accounting systems are organized and operated on a fund basis. Each school district and state-commissioned charter school is considered a local unit of administration (LUA)

<sup>&</sup>lt;sup>3</sup> The funding formula is set forth in OCGA §§20-2-161, 20-2-162, 20-2-164, 20-2-165, and 20-2-166. Chapter 24 of the "Financial Management of Georgia Local Units of Administration" handbook provides a brief description of the OBE Funding formula.

<sup>&</sup>lt;sup>4</sup> The FTE used for the calculation takes an average of the March and October counts, then compares the average percentage of growth from the previous October.

<sup>&</sup>lt;sup>5</sup> The state schools (Atlanta Area School for the Deaf, Georgia Academy for the Blind, and Georgia School for the Deaf) do not report their financial information separately using the LUA Chart of Accounts. GaDOE operates the state schools. Therefore, the financial activity of the state schools is reported in the State of Georgia Budgetary Compliance Report but not in the data file used to calculate the FESR. As a result, these schools will not receive a FESR.

for accounting purposes. All of the individual funds of an LUA are first classified by category and then by generic fund type within each category.

Except for QBE accounting in the general fund, the LUA has flexibility to establish sub-funds as needed to identify projects or programs within a fund. Fund accounting must include revenue, expenditure accounts, and a balance sheet for each project or program within a fund.

Most expenditures fall into four generic fund types: General, Special Revenue, Capital Projects, and Debt Service. Financial activity is further categorized by the following:

<u>Function</u> – The function describes the activity for which a service or material is acquired. The functions are classified into five broad areas: Instruction, Support Services, Operation of Non-Instructional Services, Facilities Acquisition and Construction, and Other Outlays.

<u>Program Codes</u> – Program codes accumulate the data for the functions used in QBE program accounting and for required reporting of QBE programs and other programs as specified by GaDOE. The program codes identify specific grant sources and uses, which allows districts and state commission charter schools to identify the expenditures related to specific grants.<sup>6</sup>

<u>Object Codes</u> – Object codes describe the service or commodity obtained as the result of a specific expenditure, such as State Health Insurance for employees, Teachers Retirement System, and supplies. With the exception of payments to charter schools, the FESR does not use the object code field because the fund, function, and program categories provide sufficient information for this purpose.

### Expenditures Excluded from the FESR<sup>7</sup>

The FESR excludes the funds, functions, and program codes listed below. In general, the PPE calculation omits expenditures that do not directly affect the K-12 population, those associated with food and facility construction, and expenditures that cannot be associated with a specific year. Additionally, the calculation excludes expenditures for students that are outside of the district's enrollment zone. The table lists detailed justification for each exclusion. Any fund, function, or program code not listed below is included in the PPE calculation.

-

<sup>&</sup>lt;sup>6</sup> See appendix for a list of program codes associated with either Federal or State and Local expenditures.

<sup>&</sup>lt;sup>7</sup> References to Even Start (Fund Code 422, Program Code 1790) were removed from the list of expenditures excluded from FESR, since this fund and program code no longer exist. Any reported usage of this fund is incorrect and will be included in expenditures.

|                  | Exclu  | ded Codes   |
|------------------|--|---|
| Code             | Fund Type  | Justification   |
| 200              | Debt Service   | Principal, interest, and associated fees for general, long-<br>term debt can be tied to expenses over multiple years.   |
| 3XX              | Capital Projects   | Construction of major capital facilities occurs over<br>many years. Designation to one year would<br>disproportionally add to that year's total expenditures.   |
| 480              | USDA Summer Food Program   | These expenditures are for food.  |
| 500              | School Activity Accounts   | These funds are largely raised from local donations.  |
| 510              | Adult Education  | These expenditures are targeted at populations that are   |
| 514              | Head Start   | outside of K-12.  |
| 530              | GLRS Grant   | For some districts, these expenditures for Georgia Learning Resources System (GLRS) are charged to the RESA. For others, they are charged to the school/district. The programs serve students outside of the district's enrollment area.                        |
| 532              | GNETS Program  | For some districts, these expenditures for Georgia Network for Educational and Therapeutic Support (GNETS) are charged to the RESA. For others, they are charged to the school/district. The programs serve students outside of the district's enrollment area. |
| 560              | Pre-Kindergarten-Lottery   | These expenditures are targeted at populations that are outside of K-12.  |
| 600,<br>608, 690 | School Nutrition Service Fund                                    | These expenditures are for food.  |
| 659              | School Nutrition Service Fund – Charter Schools                  | These expenditures are for food.  |
| 693              | Enterprise Fund  | These funds are largely raised from local donations.  |
| 7XX              | Trust and Agency Funds   | Schools/districts do not often have control over expenditures from trust and agency funds.  |
| 800, 801         | General Fixed Assets   | These expenditures are for fixed assets that are tied to expenses that benefit multiple years.  |
| 859              | Capital Assets – Governmental Funds – Charter Schools            | These expenditures are for fixed assets that are tied to expenses that benefit multiple years.  |
| 900              | General Long-Term Debt -<br>Governmental Funds                   | Principal, interest, and associated fees for general, long-term debt, and end-of-year balances are tied to expenses over multiple years.  |
| 902              | Pension Activity – Government-wide                               | Districts account for the government-wide pension activity in this fund. This is a long-term debt account and does not affect current financial resources.  |
| 904              | Other Post-Employment Benefits (OPEB) – Government-wide          | Districts account for the government-wide OPEB activity in this fund. This is a long-term debt account and does not affect current financial resources.   |
| 959              | General Long-Term Debt –<br>Governmental Funds – Charter Schools | Principal, interest, and associated fees for general, long-term debt can be tied to expenses over multiple years.   |

| Code  | <b>Function Type</b>                    | Justification  |
|-------|---|--|
| 0004  | End of Fiscal Year Balance Function     | These funds are not applied to expenditures during the     |
|       |   | year. This account represents a control total for ending   |
|       |   | fund balance, and is not an expenditure, but uses that     |
|       |   | placeholder in the report submitted by the LUAs.           |
| 2700  | Student Transportation                  | Transportation funds vary by size, geography and           |
|       |   | enrollment of district.                                    |
| 3100  | School Nutrition                        | These expenditures are for food.                           |
| 4000  | Facilities Acquisition and Construction | Construction of major capital facilities occurs over       |
|       | Services                                | many years. Designation to one year would                  |
|       |   | disproportionally add to that year's total expenditures.   |
| 5000, | Other Outlays/Debt Service              | Principal, interest and associated fees for general, long- |
| 5100  |   | term debt, and end-of-year balances can be tied to         |
|       |   | expenses over multiple years                               |

| Code  | Program Type                         | Justification   |
|-------|--------------------------------------|---|
| 1540  | Georgia Prekindergarten Program      | These expenditures are targeted at populations that are |
| 1730  | Striving Readers Birth-5             | outside of K-12.  |
| 1860  | USDA Summer Food Program             | These expenditures are for food.                        |
| 2620  | Pre-School Disability Services Grant |   |
| 2820  | Pre-School- Regular Project, Special | These expenditures are targeted at populations that are |
|       | Education                            | outside of K-12.  |
| 6030, | Head Start                           | outside of K-12.  |
| 6040  |                                      |   |

| Code | Object Type                 | Justification   |
|------|-----------------------------|---|
| 594* | Payments to Charter Schools | These expenditures represent payments from the district to local charter schools based on their QBE allotment and contract agreement. The expenditures are not the actual expenditures of the charter school.  *The school must report expenditures incurred by the local charter school in Fund 599 to remove the expenditures in object code 594. Otherwise, a disclosure |
|      |                             | note will be added to the comment section that states the charter school failed to review expenditure data submitted by the district.   |

### School Codes Excluded from the FESR

In the annual financial report, expenditures are listed by school code. These four-digit codes are unique to each school in the district. In addition to schools, the financial report also contains expenditures for other programs that also have school codes. For example, central office expenditures are listed under school code 8010. Transportation facilities, maintenance facilities, some Pre-K programs, alternative programs, career academy programs, and new school facilities are other examples of programs that have school codes.

The FESR excludes the following school codes:

| Code                      | School Code Type                     | Justification   |
|---------------------------|--------------------------------------|---|
| 8012                      | Transportation Facility              | Transportation funds vary by size, geography, and enrollment of district.   |
| 8015                      | Consolidated School Nutrition        | These expenditures are for food.  |
| Varies<br>by<br>District* | Residential Treatment Center/Program | These expenditures are for residential treatment centers or programs that may serve students from outside the district. |
|                           |                                      | *Based on a list generated annually by GaDOE.   |

## Allocation of Expenditures of College and Career Academies

The FESR distributes the expenditures of College and Career Academies (CCAs) to all high schools in the district based on proportional enrollment in grades 9-12.8 If a CCA serves multiple districts, the FESR distributes expenditures to all high schools in those districts. For the purposes of FESR, CCAs are programs identified by GaDOE's Policy Division. The FESR considers CCAs that report FTE as schools, so the FESR does not redistribute expenditures from these schools.

### Allocation of Expenditures of Alternative Programs

The FESR distributes expenditures of alternative programs to all schools in the district that serve students in the same grade cluster (elementary, middle, and high) based on proportional enrollment in those grade clusters. For the purposes of FESR, alternative programs are identified using a crosswalk provided by GaDOE's Facilities Division. Alternative programs have the following instructional purposes, regardless of whether the program is marked as open or closed:

- GNET
- Non-Traditional
- Non-Traditional School
- Blank

The FESR allocates expenditures for these programs to the schools that serve the same grade bands, including local charter schools, unless:

- The district did not provide the grade configuration for the program,
- The program serves all three grade bands, or

<sup>&</sup>lt;sup>8</sup> A high school is defined as a school serving any students in grades 9-12 during the October FTE count.

• The program serves only pre-K.

If any of the above three criteria are met, the FESR assigns expenditures to centralized costs.

## Allocation of Centralized Costs

For the school ratings, a school's total expenditures are the sum of the school-level expenditures and the school's share of the centralized costs. These centralized costs are comprised of expenditures allocated at the district level (e.g., central office and maintenance expenditures) and expenditures for schools that do not have October FTE counts (e.g., expenditures coded to facilities), except for expenditures for CCAs and alternative programs, as discussed above.

For locally approved charter schools, the centralized cost calculation is 3% of the school's total included expenditures (less the estimated 3% received from the district). Local charter schools receive a variety of services from districts depending on each school's agreement, but those services in most cases are significantly fewer than the traditional schools. Each year, districts transfer funds for operation to charter schools via object code 594, and districts are entitled to deduct up to 3% of this amount to cover any services provided by the district. With this in mind, the formula for the local charter schools is 3% of the total included expenditures using the following formula:

Centralized Cost Allocation to Local Charter = Total Included Expenditures ÷ 0.97 \* 0.03

While not all districts withhold 3% for services, this method will ensure that the total cost of services assigned to the school does not exceed the 3% maximum. The formula for calculating PPE for locally approved charter schools is as follows:<sup>9</sup>

$$\label{eq:local Charter School PPE} \ = \frac{school\ expenditures + 3\%\ of\ transfer\ from\ district}{Fall\ FTE\ enrollment}$$

To be considered a local charter school for the FESR, the school must be a start-up local charter school with a site allotment or have positive expenditures in object code 594.<sup>10</sup>

To calculate the remaining district centralized costs for traditional schools, the following formula is used:

Total District Centralized Costs – Sum of Centralized Cost Allocation to Local Charters = District Costs Divided Among Traditional Schools

These centralized costs are allocated to all non-charter schools within a district (that have expenditures and FTE enrollment counts) based on their share of the districts' Fall FTE Enrollment

<sup>&</sup>lt;sup>9</sup> School expenditures refer to those expenditures assigned to the local charter schools only, not additional expenditures due to CCAs or alternative programs.

<sup>&</sup>lt;sup>10</sup> Schools expenditures incorrectly reported to Object 594 will not be subject to this formula.

in grades K-12. Please note the enrollment counts for the Residential Treatment Centers, schools with no reported expenditures, and locally approved charter schools that report expenditures in object 594 are removed from the district total enrollment for this calculation. The total of both the school-level expenditures and the allocated district expenditures are then divided by the Fall FTE enrollment to determine that school's PPE for the year, using the following formula:

Traditional School PPE =

 $\frac{school\ expenditures + ((district\ expenditures - sum\ of\ centralized\ costs\ to\ local\ charters) * proportional\ enrollment\ percentage)}{Fall\ FTE\ enrollment}$ 

## School Code Changes

The FESR uses a unique identifier for each school (the system code and the school code) to match schools across years. Some schools change school codes over time for various reasons. Each year, GaDOE produces a list of schools which have changed school codes between school years. GOSA developed a policy to account for these school code changes for the purposes of the FESR. This policy is available on the GOSA Financial Efficiency Star Rating webpage.

## **Full-Time Equivalent (FTE) Student Counts**

To calculate PPEs, the FESR uses the FTE counts for K-12 students that are reported for each district and school in October of the fiscal year under review. For example, the 2018 District FESR uses the FTE counts submitted by each district in October 2015, October 2016, and October 2017. Since the 2018 school FESR includes only 2017 and 2018 expenditures information, only the October 2016 and October 2017 FTE counts are used.

### **Measure of Student Achievement**

To measure student achievement, the FESR uses the CCRPI, the statewide accountability measure. The CCRPI is based on standardized test scores, student growth on these tests, graduation rates, and other factors. For more information on the CCRPI, including a calculation guide, visit the Georgia Department of Education's website.<sup>13</sup>

<sup>&</sup>lt;sup>11</sup> FTE counts from RTCs and schools with no reported expenditures are removed from the district enrollment counts.

<sup>&</sup>lt;sup>12</sup> The October FTE Counts can be located on GaDOE's website.

<sup>&</sup>lt;sup>13</sup> Although CCRPI calculations changed in 2018, the changes do not affect the FESR since the change applies to all schools/districts.

## **FESR Calculation Steps**

#### District FESR

Using the annual financial report submitted by each school district, complete the following steps for each year to obtain the PPE number for each fiscal year for each district:<sup>14</sup>

- 1. Drop the excluded funds, functions, programs, and objects (see table above).
- 2. Drop the excluded school codes (<u>see table above</u>). Incorporate any school code changes based on the GOSA policy on school code changes for expenditures data.
- 3. Disaggregate expenditures into Federal and State/Local expenditures (see appendix below). 15
- 4. Sum the expenditures for each school code (school's expenditures).
- 5. Merge expenditures with that year's October FTE counts.
- 6. Determine the amount of the centralized costs (district total centralized costs). This includes any school code that does not have K-12 FTE counts for that year.
- 7. Determine the district enrollment number. This number is the sum of the Fall FTE enrollment counts for the schools that have expenditures but are not counted as district expenditures as defined above.<sup>16</sup>
- 8. Sum all of the schools' expenditures to obtain the total expenditures for the district.
- 9. Divide the total expenditures by the district enrollment number to obtain the PPE. Round this number to the nearest cent.

After the above steps have been completed, use the following steps to determine the FESR.

- 10. Calculate the three-year average PPE. Round to the nearest cent.
- 11. Calculate the three-year average CCRPI. Round this number to the first decimal place.
- 12. Generate a percentile for the average PPE for districts that have both PPEs and CCRPI scores in all three years. Round to the nearest whole number.<sup>17</sup> Although state charter

• Dollar amounts are rounded to the nearest cent (e.g., \$100.24).

<sup>&</sup>lt;sup>14</sup> FESR calculations utilize the following rounding rules:

<sup>•</sup> CCRPI scores are rounded to the nearest tenth (e.g., 64.5).

<sup>•</sup> Enrollment percentages are rounded to the nearest hundredth (e.g., 45.55%).

<sup>&</sup>lt;sup>15</sup> If Federal and State/Local expenditures do not add up to total expenditures, then calculate State/Local expenditures as State/Local expenditures—Total expenditures—Federal expenditures.

<sup>&</sup>lt;sup>16</sup> This number may differ from the total FTE count for the district because some schools with FTE counts do not report expenditures. The FTE counts for schools without expenditures are excluded in this step. FTE counts from RTCs and local charter schools are also excluded.

<sup>&</sup>lt;sup>17</sup> The following calculation is used to generate percentiles:

<sup>1.</sup> Rank all of the observations in terms of PPE from lowest to highest. Equal values are assigned the average rank.

<sup>2.</sup> Determine the total number of observations that have a PPE.

<sup>3.</sup> For each school/district, divide the school's/district's rank by the total number of observations and multiply by 100. Round this number to the nearest whole number.

<sup>4.</sup> This generates a percentile rank ranging from 0-100.

## Calculation Guide for the 2018 Financial Efficiency Star Rating

- schools comprise their own districts (LEAs), they are not included in the district-level FESR. They are included only in the school-level calculations.
- 13. Generate a star rating using the PPE percentile and the average CCRPI based on the following matrix:

| ****                  | CCRPI Average |         |         |         |         |              |
|-----------------------|---------------|---------|---------|---------|---------|--------------|
| Percentile of Average | Less than     | 50-59.9 | 60-69.9 | 70-79.9 | 80-89.9 | 90 and Above |
| PPE                   | 50            |         |         |         |         |              |
| 81-100 (High          | 0.5           | 1       | 1.5     | 2       | 2.5     | 3            |
| Spending)             |               |         |         |         |         |              |
| 61-80                 | 1             | 1.5     | 2       | 2.5     | 3       | 3.5          |
| 41-60                 | 1.5           | 2       | 2.5     | 3       | 3.5     | 4            |
| 21-40                 | 2             | 2.5     | 3       | 3.5     | 4       | 4.5          |
| 0-20 (Low Spending)   | 2.5           | 3       | 3.5     | 4       | 4.5     | 5            |

#### School FESR

To obtain the PPE for each fiscal year for each school:

- 1. Drop the excluded funds, functions, programs, and objects (see table above).
- 2. Drop the excluded school codes (<u>see table above</u>). Align any school code changes based on the <u>GOSA policy on school code changes for expenditures data</u>.
- 3. Disaggregate expenditures into Federal and State/Local expenditures (see appendix below). 18
- 4. Sum the expenditures for each school code (school's expenditures).
- 5. Merge with that year's October FTE counts.
- 6. Allocate the CCA expenditures to high schools based on proportional high school enrollment.
- 7. Allocate the expenditures for alternative programs to schools that serve students in the same grade cluster(s) based on proportional enrollment in those clusters.<sup>19</sup>
- 8. Determine the amount of the centralized costs (district total centralized costs). This includes any school code that does not have K-12 FTE counts for that year, except for CCAs and alternative programs.
- 9. Calculate the centralized cost allocation to local charter schools (local charter school centralized costs). Subtract these amounts from the district total centralized costs.
- 10. Determine the district enrollment number. This number is the sum of the Fall FTE enrollment counts for the schools that have expenditures but are not counted as district expenditures as defined above. Local charter schools are not included in the district enrollment number for the school FESR.<sup>20</sup>
- 11. For traditional schools (not local charter schools), generate the percentage of total district enrollment for each school that has expenditures. The percentage of total district enrollment is rounded to the second decimal place (e.g., 13.56%). Allocate the district expenditures to the schools based on their percentage of total district enrollment. Round this dollar amount to the nearest cent. Add this amount to the school's expenditures to obtain the school's total expenditures.
- 12. For local charter schools, obtain the total expenditures by adding the school's expenditures with the local charter school centralized costs.
- 13. Divide the total expenditures by the Fall FTE count to obtain the PPE. Round this number to the nearest cent.

<sup>&</sup>lt;sup>18</sup> If Federal and State/Local expenditures do not add up to total expenditures, then calculate State/Local expenditures as State/Local expenditures—Total expenditures—Federal expenditures.

<sup>&</sup>lt;sup>19</sup> Unless the program serves pre-K only, all three grade bands, or no grade configuration is provided. If any of these conditions are met, program expenditures are assigned to centralized costs.

<sup>&</sup>lt;sup>20</sup> This number may differ from the total FTE count for the district because some schools with FTE counts do not report expenditures. The FTE counts for schools without expenditures are not counted in this step. FTE counts from RTCs and local charter schools are also excluded.

After the above steps have been completed, use the following steps to determine the FESR.

- 14. Calculate the two-year average PPE. Round to the nearest cent.
- 15. Calculate the two-year average CCRPI. Round this number to the first decimal place.
- 16. Generate a percentile for the average PPE for schools that have both PPEs and CCRPI scores in both years.<sup>21</sup> Round to the nearest whole number.<sup>22</sup>
- 17. Generate a star rating using the PPE percentile and the CCRPI score based on the following matrix:

| ****                      | CCRPI Score  |         |         |         |         |              |
|---------------------------|--------------|---------|---------|---------|---------|--------------|
| Percentile of PPE         | Less than 50 | 50-59.9 | 60-69.9 | 70-79.9 | 80-89.9 | 90 and Above |
| 81-100 (High<br>Spending) | 0.5          | 1       | 1.5     | 2       | 2.5     | 3            |
| 61-80                     | 1            | 1.5     | 2       | 2.5     | 3       | 3.5          |
| 41-60                     | 1.5          | 2       | 2.5     | 3       | 3.5     | 4            |
| 21-40                     | 2            | 2.5     | 3       | 3.5     | 4       | 4.5          |
| 0-20 (Low Spending)       | 2.5          | 3       | 3.5     | 4       | 4.5     | 5            |

## Release of the Financial Efficiency Star Rating

The district-wide and school-level per pupil expenditure data will be released in the Financial Review Application included in the GaDOE secure file portal. The Superintendent and the Financial Review Coordinator will have the opportunity to review the district-level expenditure calculation and provide a management response that will be published on GaDOE's website. Instructions for reviewing the expenditure data and issuing a management response will be provided to school systems in a separate document.

\_

<sup>&</sup>lt;sup>21</sup> Schools that do not have PPEs or CCRPI scores in all years included in the FESR calculation do not receive a star rating.

<sup>&</sup>lt;sup>22</sup> The following calculation is used to generate percentiles:

<sup>1.</sup> Rank all observations in terms of PPE from lowest to highest. Equal values are assigned the average rank.

<sup>2.</sup> Determine the total number of observations that have a PPE.

<sup>3.</sup> For each school/district, divide the school's/district's rank by the total number of observations and multiply by 100. Round this number to the nearest whole number.

<sup>4.</sup> This generates a percentile rank ranging from 0-100.

## **Overall Limitations of the Financial Efficiency Star Rating**

While the Financial Efficiency Star Rating provides additional information about the relationship between PPE and student achievement, users should note its limitations. Although all districts follow the same reporting guidelines, inconsistencies in the use of school codes have resulted in the districts reporting similar expenditures in different ways to the GaDOE. For example, a school district that reports teacher salary expenditures at the district level will result in very high district allocations relative to a district that reports teacher salary expenditures at the school level. The Financial Review Division updated the Financial Management for LUAs Handbook, Chapter II-6, effective May 2016. This chapter was updated based on the clarification to State Board Rule 160-5-2-.21, adopted May 2016. State Board Rule 160-5-2-.21 requires each district and state commission charter to report expenditures on an annual basis using a school/facility/program code to allocate the expenditures to a specific school or location. This rating is designed to be used in conjunction with other information to obtain a holistic assessment of a school or district.

# **APPENDIX**

## Federal and State/Local Expenditures

The following table provides the codes associated with relevant Federal and State/Local expenditures:

| State/Local<br>or Federal | Code          | Program Description                                    |
|---------------------------|---------------|--|
| State/Local               | 1011,<br>1013 | KINDERGARTEN   |
| State/Local               | 1021          | PRIMARY GRADES PROGRAM 1-3                             |
| State/Local               | 1023          | PRIMARY GRADES PROGRAM 1-3 - LOCAL                     |
| State/Local               | 1031          | MIDDLE GRADES PROGRAM 6-8                              |
| State/Local               | 1033          | MIDDLE GRADES PROGRAM 6-8 - LOCAL                      |
| State/Local               | 1041          | HIGH SCHOOL GENERAL EDUCATION PROGRAM 9-12             |
| State/Local               | 1043          | HIGH SCHOOL GENERAL EDUCATION PROGRAM 9-12 - LOCAL     |
| State/Local               | 1051          | UPPER ELEMENTARY GRADES PROGRAM 4-5                    |
| State/Local               | 1053          | UPPER ELEMENTRY GRADES PROGRAM 4-5 - LOCAL             |
| State/Local               | 1061,<br>1063 | KINDERGARTEN EARLY INTERVENTION PROGRAM                |
| State/Local               | 1071          | PRIMARY GRADES EARLY INTERVENTION PROGRAM 1-3          |
| State/Local               | 1073          | PRIMARY GRADES EARLY INTERVENTION PROGRAM 1-3 - LOCAL  |
| State/Local               | 1081          | MIDDLE SCHOOL PROGRAM 6-8                              |
| State/Local               | 1083          | MIDDLE SCHOOL PROGRAM 6-8 - LOCAL                      |
| State/Local               | 1091          | PRIMARY GRADES EARLY INTERVENTION PROGRAM 4-5          |
| State/Local               | 1093          | PRIMARY GRADES EARLY INTERVENTION PROGRAM 4-5 - LOCAL  |
| State/Local               | 1100          | TWENTY DAYS ADDITIONAL INSTRUCTION                     |
| State/Local               | 1111          | SECONDARY GENERAL LABORATORY                           |
| State/Local               | 1210          | STAFF DEVELOPMENT (FUNCTION 2210 ONLY)                 |
| State/Local               | 1211          | PRINCIPAL STAFF & PROFESSIONAL DEVELOPMENT             |
