Background

The Georgia Promise Scholarship Act, also known as [Senate Bill 233](#), tasked the Governor's Office of Student Achievement (GOSA) with calculating the lowest 25th percentile of public schools. This legislation amended Title 20 of the Official Code of Georgia to create state-funded accounts for eligible students to use for non-public education expenses.

The legislation states in OCGA Section 20-2B-29:

(a) In the annual report required by paragraph (2) of subsection (a) of Code Section 20-14-27, the Office of Student Achievement shall include a separate list of public schools that performed in the lowest 25 percent of all public schools based on the cumulative individual school ratings, as provided for in subsection (d) of Code Section 20-14-33, for the two most recent school years for which the Office of Student Achievement issued such ratings; provided, however, that in the event of a tied rating, the public school with the lower performance in student achievement shall be prioritized; provided, further, however, that such list shall not include any school with more than 50 percent of its enrolled students assigned to an education program provided for in Code Section 20-2-154.1.

(b) By December 1 of each year, the Office of Student Achievement shall publish on its [website](#) the list provided for in subsection (a) of this Code section.

The Georgia Promise Scholarship Public School List is based on GOSA’s calculated CCRPI Single Scores from the 2023-24 and 2024-25 school years. This document provides the business rules used to identify public schools in the lowest 25th percentile.

Promise Act Public School List Calculation Business Rules

1. GOSA uses the statistical program Stata® for the official calculation of the Promise Act Public School List. Stata maintains high precision (approximately 15 significant digits) while making these calculations. GOSA performs all official calculations in Stata using double precision. For more information regarding precision in Stata, [click here](#).
2. GOSA's 2025 Promise Act Public School List was validated through: (1) independent calculation by five analysts, and (2) systematic comparison of results with 100% agreement for the list of excluded schools and the lowest 25th percentile list.

Excluded Schools

1. State Charter Schools
2. Locally Authorized Charter Schools
3. Conversion Charter Schools
4. Online/Virtual Schools
5. Non-Traditional/Alternative Schools¹
6. Schools with Only PreK – 2nd Grade Students²
7. Residential Treatment Facilities
8. Department of Juvenile Justice Schools
9. State Schools for the Blind and Deaf
10. Schools Missing One and/or Both Years of CCRPI Calculation(s)
11. Magnet Schools

Calculation of the Lowest 25th Percentile List

1. Exclude all schools meeting the exclusion criteria from the total list of public schools.
2. Generate an average CCRPI Single Score for all included schools by adding the 2024 and 2025 CCRPI Single Scores and dividing by two.

a. $(\text{CCRPI Single Score 2024} + \text{CCRPI Single Score 2025}) / 2$

¹ Alternative/Non-Traditional schools receive a state or federal accountability determination, report FTE, and earn QBE formula funds directly. GaDOE distinguishes between Alternative Education Programs and Alternative/Non-Traditional schools, and GOSA only excludes the latter from this list.

² Schools serving only Pre-K to 2nd-grade students do not have 3rd-grade Milestone Assessments.

- b. Round the average CCRPI Single Score to **one** decimal place (0.1).
3. Determine quartiles and the associated cut score of the lowest 25th percentile based on the average CCRPI Single Score calculated in the previous step.
 - a. The lowest 25th percentile list will include all the schools with a cut score equal to or less than the identified cut score of the lowest quartile.
 - b. The cut score for the 2025 Promise Act Public School List was **67.5**
