<sup>1</sup>The number of schools is higher than the actual number of schools in the state. Scores are split into Elementary (K-5), Middle (6-8), and High School (9-12) categories. Schools with grade configurations in multiple categories receive a separate CCRPI score for both categories.

<sup>2</sup>The averages given in this e-bulletin differ from averages in the GaDOE's press release because the GaDOE rolled up the scores to the state level, meaning that the CCRPI formula was applied at the state level for all students. The calculations in this report represent a mean score that counts every school as one entity, regardless of size.
